

zeal

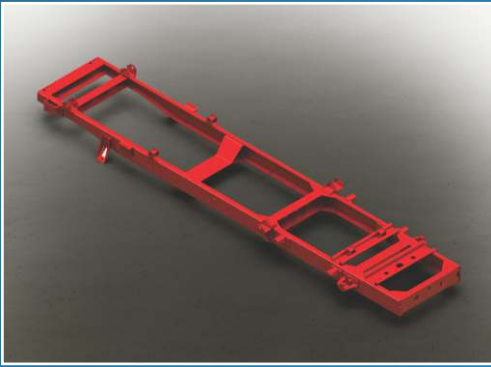

Zeal CAD services

We meet the needs of small businesses
that do not require a full time CAD Services

Established in Melbourne Zeal CAD is the one of leading mechanical engineering solution provider company in Australia and currently engages in variety of engineering projects to support our customers in their use of engineering technology.

We offer broad range of CAD services ranging from 2D drafting to advanced 3D surface/Solid modeling and analysis.

We are specialized in following areas

Truck Chassis Design

Hydraulic Design Solution for Water Treatment Projects

Bulk Material Handling System Designs

Hydraulic and Pneumatic Design with Flow Charts

Robotics and Automation Systems

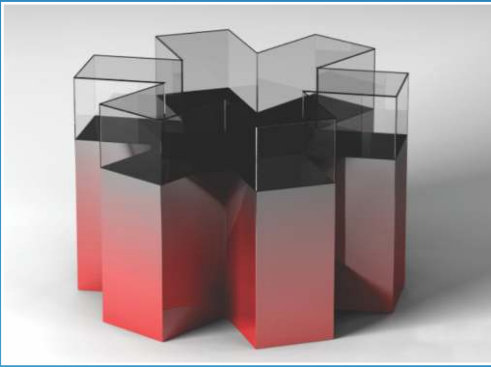

Machine Design with Functional Prototype Model

3D Scanning

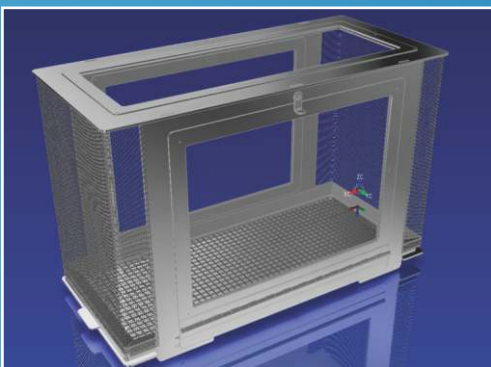

We utilize 3D scanning as a reverse engineering tool to gather component information accurately and quickly. Once obtained, this data can be exported to 3D modeling software for optimization or sent directly to a rapid prototyping machine for build. Once an object has been converted to three dimensional data, it can be used in many ways. It can be scaled up or down and milled on a CNC milling machine or used for a variety of rapid prototyping processes.

Display System Designs

Furniture CAD Drawings

Steel and Sheet Metal
Fabrication with Bill of Materials

Machine Tool Design
and Component Designs

Jig and Fixture Designs

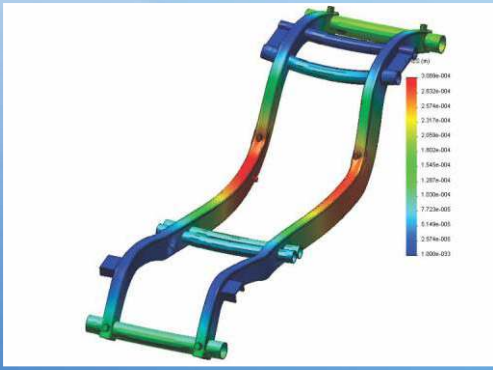

Fiberglass Designs and Moulding

3D Printing

3D printing is a form of rapid prototyping that can produce physical objects direct from 3-dimensional CAD data. The process works by 'slicing' the data geometry into many 2-dimensional cross section layers and re-constructing them successively within the printer.

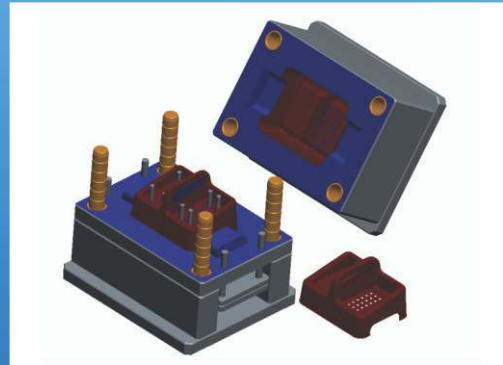

Product Design- Analysis/simulation

Trailer Design and Optimization

CNC Design Solutions

Plastic Moulding

Services We Offer includes

- Mechanical Engineering
- Mechanical Design Services
- Mechanical Drafting Detailing
- Mechanical 3D Modelling
- Mechanical Animation
- Reverse Engineering
- Conceptual Engineering
- Rapid Prototyping
- FEA Design Analysis
- Jigs Fixture Design
